

Your blood test summary

Overall wellness score

Your results show a few noticeable imbalances that might indicate temporary stress on certain body systems.

- The elevated glucose level may suggest a need for dietary adjustments or further evaluation of metabolic health.
- Triglycerides and VLDL cholesterol levels are slightly elevated, which could indicate a need for lifestyle modifications.
- Other markers such as hematocrit and hemoglobin are within normal ranges, indicating stable red blood cell production.

Overall, your results don't point to any critical condition, but they do suggest that your body might be under mild strain and would benefit from recovery support and balanced lifestyle habits.

Marker	Value	Normal Range		Interpretation
● Basophils Absolute	0.07		0.04 - 0.54 10^9/L	Normal
● Eosinophils Absolute	0.09		0.50 - 5.00 10^9/L	Slightly Low
● Hematocrit	48.9		35.54 - 54.00 %	Normal
● Hemoglobin	165		130.00 - 160.00 g/L	Slightly High
● Lymphocytes Absolute	22.09		1.90 - 3.70 10^9/L	Slightly High
● Mean Corpuscular Hemoglobin	31.1		27.33 - 33.00 pg	Normal
● Mean Corpuscular Hemoglobin Concentration	33.7		32.36 - 36.00 g/L	Normal
● Mean Corpuscular Volume	92.3		76.96 - 96.00 fL	Normal
● Monocytes Absolute	1.57		1.32 - 3.57 10^9/L	Normal
● Mean Platelet Volume	10		6.13 - 13.00 fL	Normal
● Neutrophils Absolute	235		1.78 - 5.38 10^9/L	Normal
● Platelet Distribution Width	11.8		10.00 - 20.00 %	Normal

Your blood test summary (continued)

Marker	Value	Normal Range	Interpretation
Red Cell Distribution Width CV	13.1	12.00 - 15.00 %	Normal
Red Cell Distribution Width SD	44.6	35.46 - 46.00 fL	Normal
Creatinine	89	62.00 - 106.00 μmol/L	Normal
Urea	8.1	2.76 - 8.07 mmol/L	Slightly High
LDL Cholesterol	1.55	0.00 - 3.36 mmol/L	Normal
Triglycerides	2.89	0.00 - 2.26 mmol/L	Slightly High
VLDL Cholesterol	1.55	0.26 - 1.00 mmol/L	Slightly High
Direct Bilirubin	3.1	0.00 - 5.00 μmol/L	Normal
Total Bilirubin	10.2	0.00 - 21.00 μmol/L	Normal
Glucose	6.16	4.11 - 5.89 mmol/L	Slightly High

Your personalized recommendations

Nutrition advice

- Discuss with your doctor about incorporating more whole grains and fiber-rich foods into the diet.
 - Ask your physician about reducing sugar intake to help manage glucose levels.
 - Consult a nutritionist to explore healthy fats and lean proteins for balanced meals.
-

Supplement recommendations

- Discuss with your doctor about considering a multivitamin to support overall health.
 - Consult your healthcare provider before taking omega-3 supplements, which may help with inflammation.
 - Your doctor may recommend vitamin D supplementation, especially if there is limited sun exposure.
-

Medical guidance

- Discuss with your doctor about any medications that may help manage cholesterol levels if necessary.
 - Your healthcare provider may consider prescribing medications to help regulate blood sugar if lifestyle changes are insufficient.
 - Consult your physician regarding any over-the-counter medications that may support digestive health.
-

Exercise guidelines

- Consult your healthcare provider before starting any new exercise program, especially if there are concerns about cardiovascular health.
 - Discuss with your doctor about incorporating regular physical activity, such as walking or cycling, to support overall wellness.
 - Your physician may recommend specific types of exercise to improve cardiovascular fitness and manage weight.
-
